ENERGY SAVINGS DAYS SUCCESS STORIES 2017

Thank you for participating!

This past summer, you and over 300,000 other BGE customers received over \$20 million in bill credits by participating in PeakRewardsSM Air Conditioning program. Your participation in this program helps to manage summer peak demand, reduce the need for additional power plants and keep down the overall price of electricity as our state's population continues to grow.

Thanks again for participating in PeakRewards and Energy Savings Days.

\$20.7M total PeakRewards bill credits paid

We want to hear from you!

Are you satisfied with the PeakRewards program? Are there ways we could improve the program?

Share your thoughts in our quick customer satisfaction survey. It should take less than five minutes, and will help us work toward meeting your expectations.

[TAKE SURVEY](#)

Maximize your savings with a smart meter.

If you don't already have one, a smart meter can help to potentially earn you higher bill credits on Energy Savings Days. A smart meter allows you to participate on Energy Savings Days and reduce your electricity usage to earn bill credits. You are guaranteed to receive at least your monthly PeakRewards credit (June-September). If you reduce your electricity usage during Energy Savings Days, you could earn even more! You can earn a bill credit of \$1.25 for every kilowatt-hour saved compared to your typical usage. There could be up to six Energy Savings Days per summer.

Call today to schedule your smart meter installation – **800.685.0123**

Want to save even more?

Participate in more than one BGE program and bundle your savings!

Take advantage of these BGE Smart Energy Savers Program[®] offers:

› **Appliance Rebates:** Purchase select certified ENERGY STAR[®] appliances.

[LEARN MORE](#)

› **Quick Home Energy Check-up:** An energy efficiency professional will conduct a one-hour walk-through to check the condition of its insulation, HVAC system, lighting, appliances and install energy-saving measures such as LED bulbs, efficient flow showerheads and Smart Strips at no additional cost.

Planning a winter escape?

Consider using a Wi-Fi thermostat that allows you to set and adjust your home heating remotely. To save energy while you're away, use a smart phone app to set your thermostat back a few degrees. You can re-adjust your temperature setting to make sure your home is comfortable when you return.
